

Acoustically insulated duct fans are made of galvanized steel. The fan casing has thermal and acoustic 50 mm insulation. These products can not be operated in explosive environment. Fans can supply/extract clean air. Fans are mounted into the round air duct systems. Centrifugal fans, motors with free-maintenance ball bearings, are used for the AKU fans. The motors have automatic thermal protection. Fans with TK terminals have integrated thermo-contact protection of the motor.

Fans have easily opening cover which ensures easy service.

Maximum motor current is marked nearby the rated power supply voltage. If the control voltage is reduced, motor current can exceed the rated current. Considering this, we recommend respective speed controllers for every fan.

Acoustically insulated fans can be mounted only indoors.

Les caissons de ventilation insonorisés AKU sont réalisés à partir de tôle galvanisée.

L'enveloppe possède une isolation thermique et acoustique de 50 mm. Ces produits sont destinés à la ventilation d'air hygiénique et ne sont pas appropriés à un fonctionnement en environnement à risque d'explosion. Ils sont pourvus de piquages avec joint pour un raccordement direct sur conduits d'air circulaires.

Les ventilateurs centrifuges utilisés dans les caissons AKU sont équipés moto-ventilateurs à rotor extérieur, ne nécessitant pas d'entretien. Les moteurs possèdent une protection thermique à réarmement automatique.

Les ventilateurs avec bornes TK-TK intègrent une protection du moteur par thermocontact.

L'entretien et la maintenance des ventilateurs sont facilités grâce au panneau d'ouverture sur charnières.

C'est pourquoi il est facile d'entretenir les ventilateurs. Le courant maximal et la puissance des moteurs sont indiqués près de la tension d'alimentation nominale. La variation de vitesse peut se faire par variation de tension. A cet égard, nous recommandons pour chaque ventilateur les régulateurs de vitesses adéquates.

Les caissons AKU sont exclusivement prévus pour un montage intérieur.

#### Accessories

Single phase speed controller

Monophase speed controller

Mounting clamp

Guard grilles

Back draft shutter

Circular duct silencer

Schallgedämmte Kanalventilatoren AKU bestehen aus verzinktem Stahlblech. Das Gehäuse der Ventilatoren ist mit einer 50 mm starken Isolation versehen, welche akustisch und wärmetechnisch isoliert. Diese Ventilatoren dürfen nicht in explosionsgefährdeten Umgebungen installiert werden. Sie dienen der Be- und Entlüftung. Sie werden an runde Luftkanäle angeschlossen. Die AKU Geräte sind mit radialen Ventilatoren ausgerüstet, deren Lager keiner Aufsicht bedürfen. Die Elektromotoren sind mit PTC-Fühlern oder Thermokontakten zu deren Schutz versehen. Ventilatoren mit TK-Klemmen besitzen einen Thermokontakt.

Dank ihrer guten Zugänglichkeit ist die Wartung der Ventilatoren einfach.

Der Motoren-Nennstrom ist angegeben und darf nicht überschritten werden. Nur bei verringriger Steuerspannung darf der Nennstrom auch etwas darüber liegen. Wir empfehlen für jeden Ventilator den Einsatz eines Drehzahlreglers.

AKU Ventilatoren sind nur innerhalb der Gebäude einzusetzen (nicht im Freien).

Канальные акустические вентиляторы изготавливаются из оцинкованной жести. Корпус вентиляторов имеет 50 мм слой термической и акустической изоляции. Данные изделия не могут работать во взрывоопасной среде. Эксплуатируются в целях подачи и вытяжки чистого воздуха. Монтируются в системы круглых воздуховодов. В вентиляторах AKU используется центробежные вентиляторы, подшипники двигателей которые не требуют ухода. Двигатели оснащены автоматической теплозащитой. Вентиляторы с клеммами ТК имеют встроенную термоконтактную защиту двигателя.

Обзорная крышка вентилятора открывается легко, что обеспечивает удобное обслуживание.

Максимальный ток двигателя указан рядом с номинальным напряжением питания. При снижении напряжения ток двигателя может превысить указанное значение. Поэтому для каждого вентилятора рекомендуем соответствующие регуляторы скоростей.

Акустические вентиляторы монтируются только в закрытых помещениях.
